

March 2018

**Jaffa easy-peel citrus, Orri mandarins** is gaining popularity in both China and Japan.

Two products currently make up about 70% of all Israeli citrus exports: pink grapefruit which is known by its trade name "Sunrise" and "OR" – a late-ripening mandarin orange, which was developed in Israel. Picking citrus fruits ends on May but spring time is the best season for a short tour joining Citrus and Bee-keeping agrotechnology in Israel.

**You are invited to join our coming tour:**

**Horticulture: Getting Ready for Export**

**May 6-13, 2018**

## **Weifang China - Agribusiness Tour & Conference**

A group of 40 visitors from Shangdong, China came to a short agricultural tour in Israel. The group members are future partners of Green 2000, Agricultural project company. This delegation was organized by Mr. Tal Brody, ambassador of good wiling. **Green 2000 Agriculture projects** and other 7 Israeli agricultural companies were participating in the successful talents Mach-making meeting, taken place at Leonardo Plaza Netanya.

## Agriculture R&D Activity in Israel

Timorex Gold is a botanical broad-spectrum fungicide with preventative and curative activity based on a plant extract. It has earned an international reputation as a reliable broad spectrum biofungicide which controls a wide range of fungal diseases on many fruits, vegetables and specialty crops.

“As the industry leader in the development and marketing of botanical- based solutions (BBS), we are honored to receive the 1st Place PROVIDER OF CHOICE Award for Timorex Gold”, said Guy Elitzur, CEO of STK. We are constantly striving to develop and bring innovative natural and environmentally-friendly solutions to farmers around the world. Timorex Gold is at the forefront of the revolution in sustainable agriculture.”

**Visiting Israel is a great opportunity to detect the latest research and development activities taken place at the agricultural sector.**
